

INJECTION DEVICES

Bespak by Recipharm delivers market leading design, development, and manufacturing services for drug delivery devices to the global pharmaceutical market. Our portfolio includes inhalers, nasal technologies, and auto-injectors as well as development and manufacturing services. We have developed a range of customisable solutions for the injectable delivery of high viscosity drugs.

MORE ABOUT OUR PORTFOLIO

SYRINA® AS AUTO-INJECTOR

- ▶ Our most advanced auto-injector
- ▶ Featuring automatic needle insertion and audible end of dose indication

SYRINA® S AUTO-INJECTOR

- ▶ Compact design that accommodates 1ml and 2.25ml standard pre-filled syringes

SYRINA® MICRO ASSISTED SYRINGE

- ▶ Ideal solution for early stage clinical trials prior to progressing onto a VapourSoft® auto-injector
- ▶ Can be used by patients, caregivers and healthcare professionals

VISCALA® AUTO-INJECTOR

- ▶ Designed to deliver ultra-high viscosity formulations

VAPOURSOFT® TECHNOLOGY

Our VapourSoft® is used in our Syrina® and Viscalá® range of injectable devices to allow for greater flexibility in device designs when compared to conventional spring-based auto-injectors.

ADVANTAGES INCLUDED:

- ▶ A flexible energy source that enables the propellant to be altered within a single container format to tailor performance according to drug viscosity, needle, fill volume and drug delivery time
- ▶ The ability to deliver high viscosity drugs with ease
- ▶ Soft start delivery mechanism that reduces impact, making it ideal for glass primary containers
- ▶ Constant pressure profile which supports lower peak forces than conventional spring-based auto-injectors

About Bepak by Recipharm: Bepak by Recipharm delivers market leading design, development and manufacture of drug delivery devices to the global pharmaceutical market. This includes inhaler, nasal technologies and auto-injectors as well as development and manufacturing services. Recipharm is at the leading edge of drug delivery device innovation. Driven by customer and patient demand, our innovations have the potential to create new treatments and opportunities across the globe as well as accelerating routes to market.
